1. Introduction

1.1 Background

Joget merupakan platform pembuatan aplikasi low-code yang berbasis java sehingga dibutuhkan java runtime environment untuk menjalankan dan java development kit untuk pengembangannya .

2. Installation process

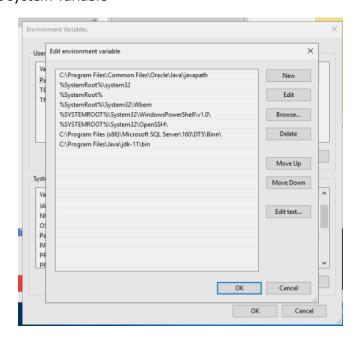

2.1 JRE or JDK installation

Java -version: java yang digunakan adalah versi 11.0.22

• Install jdk-11

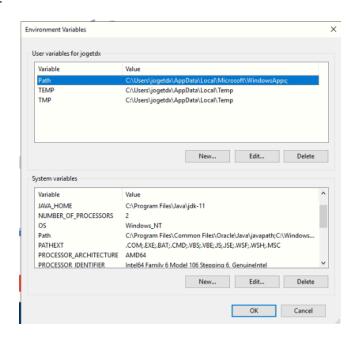

• Setting environment system variable

Setting JAVA_HOME

Verifikasi JDK terinstall

```
Microsoft Windows [Version 10.0.17763.5696]
(c) 2018 Microsoft Corporation. All rights reserved.

C:\Users\jogetdx>java --version
java 11.0.22 2024-01-16 LTS
Java(TM) SE Runtime Environment 18.9 (build 11.0.22+9-LTS-219)
Java HotSpot(TM) 64-Bit Server VM 18.9 (build 11.0.22+9-LTS-219, mixed mode)

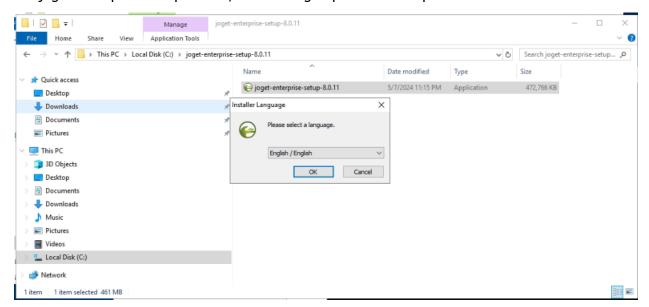

C:\Users\jogetdx>
```

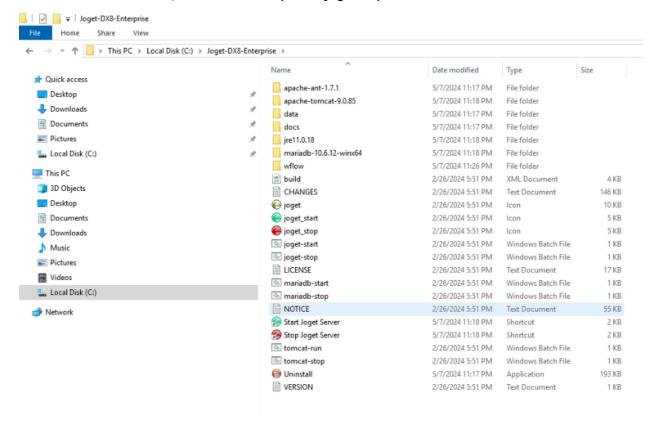

2.2 Joget installation

1. Klik joget-enterprise-setup-8.0.11, install dengan pilih next sampai finish

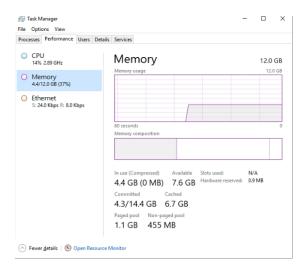

setelah instalasi ,struktur folder aplikasi joget seperti dibawah ini

 Setting memory aplikasi joget dengan mengubah Java Heap Max, check memory hardware

 pada joget-start.bat , set Java heap memory jadi 8 GB (8192 MB), dengan mengubah -Xmx option JAVA_OPTS environment variable.

 mengaktifkan aplikasi joget sebagai service menggunakan nssm, extract nssm source code, folder akan terlihat seperti dibawah ini

 buka cmd di folder win64 dan jalankan command membuat service mengarahkan ke joget-start.bat lalu click allow

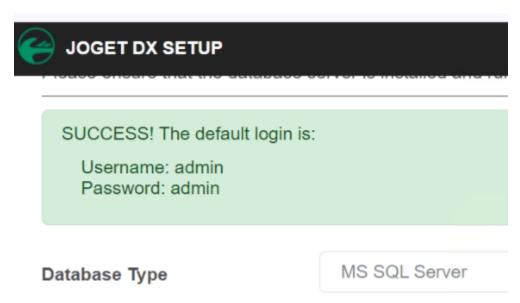

check pada services

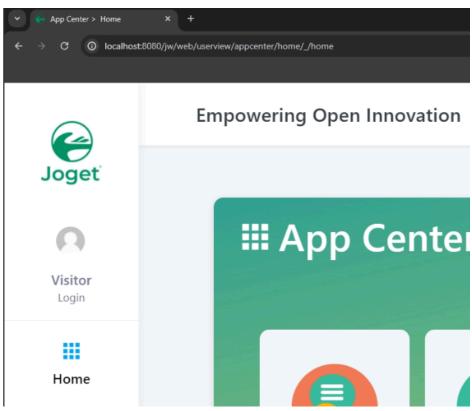

- Setup Database, pada folder /wflow hapus 2 file, app_datasource.properties dan app_datasource-default.properties, hapus file tersebut konfigurasi database
- start service dan check pada **localhost:8080/jw**, masukan informasi database yang sudah berjalan (IP, port, username, pw, nama database)

2.3 License

- 1. Pada General Setting, klik pada tombol pencil di license yang kemudian akan memunculkan pop Up license
- 2. Masukan admin dan password Platform Joget DX:

Contoh sceenshot: EE-NET-1e25931e1b632419d711e3958ebfba43
